

AIDAN WALSH

PROGRAMMING INTERNSHIP

PROFILE

I am an enthusiastic and dedicated CG and Technical Artist with three years of University training experience within Arts and Media. I pride myself on being a highly creative individual whom is always striving to learn new skills, develop my current skills and push creative boundaries. I am able to work as a part of a team, whilst also being able to work well on my own initiative.

I have recently enrolled with Code Institute, working towards achieving a Level 5 Diploma in Full Stack Developing. I have a lot of experience with programming procedural generators, enabling the development team to work efficiently in game engines. I am currently gaining experience working with different declarative and imperative languages such as SQL, JavaScript, C++, C# and Python.

I am currently seeking an internship to gain valuable life skills and work experience in coding to push myself to learn and experience new aspects of the digital industry. The technical knowledge I have gained over the years in Animation and Game Development stand me in good stead to branch out further into other IT and digital sectors.
